## **PUBLIC SERVICE ANNOUNCEMENT**

### **CITY OF UNION GAP HYDRANT FLUSHING PROGRAM - 2021**

Beginning June 1<sup>st</sup> through June 30<sup>th</sup>, the City of Union Gap will be conducting our annual hydrant flushing program, which will include a low dose of chlorine being introduced into the entire system.

Our crew will be in the residential areas between 6:00 a.m. and 4:00 p.m. Business will be completed during late evening / early morning hours and will be notified prior to maintenance occurring.

Prior to flushing activities, please have a container of water available for drinking and cooking. It is not abnormal to observe periods of discolored tap water, which may last several hours.

#### *Stop Using Water During & After Maintenance:*

- Be aware of cloudy/discolored water; stop using if possible; this will prevent discolored water from being drawn into your water service.
- Prior to using make sure the tap water is clear.
- Sediments may stain clothing if doing laundry.
- Do not operate a dishwasher or water purifier; minor amounts of sediment may cause a clog or plug to the system.

If you have special needs / concerns, please contact the Public Works Administration Office at 509.225.3524.
